

## TIM 105/205 Midterm

Lecture Notes for Lectures 1-9 will be posted

Problem 1: on the class web-site

- Microsoft Case study is on the class web-site

- Sample solutions for the INTELL problems on HW#2 & HW#3 are on the class web-site

Problem 2: (Enterprise Application software)

- There are 5 potential projects

- You need to apply Decision Analysis to compute the expected monetary value (expected profit) for each project [as in HW#4, Probs 1 & 2]

- The Time-to-market information may not ~~relevant~~ be relevant to the solution of the problem

- See Table look-up process in Lecture #8

Problem 3

Understand how video game consoles work

(www.howstuffworks.com, ....)

CONTEXT FOR THE MIDTERM:

Microsoft Case Study

OS / Productivity software  
Office

1995

Prob 1

Microsoft after 1995

Video Game  
Console

(~ 1997-1999)

Problem 3

Enterprise  
Application  
Software

(~ 2000-1)

Prob 2
